

NAWIC Indianapolis Chapter 34 Sponsorship Opportunities

Our chapter has been reaching out to members in the industry for nearly 60 years. Through our networking, education, and the chapter/regional/national events and support system, we offer our members the tools for professional as well as personal growth. After all, our core purpose is to “Enhance women in the construction industry”.

Your support allows our chapter to organize these programs and community outreach through our various committee activities. Included are community service projects to those in need but also encourage k-12 students to consider the architectural, engineering, construction and trades industry as a career path. Your support will also help our members with their professional development in the industry by allowing us to participate in regional and national conferences.
